

IMDG

Transportation of such cargoes may require the following essential mandatory requirements in **STOWAGE AND SEGREGATION**

- Mandatory for entry of individual cargoes.

HOLD CLEANLINESS

- Mandatory for prevention of dangerous contamination with other cargoes and/or materials.
- Mandatory dry holds for cargoes that react with water, emit gases, decompose or generate corrosion.

WEATHER PRECAUTIONS

- Mandatory for prohibition or restriction of loading and/or discharging during precipitation of cargo which may liquefy upon reaction with water.

LOADING

- Mandatory limitation of moisture content for cargoes which may liquefy at shipment.
- Mandatory limitation of temperature of dangerous goods of class 4.2 or similar at shipment.
- Mandatory limitation of electric equipment use in holds for goods of class 5.1 or similar materials.
- Mandatory limitation of operation of fuel oil during handling goods of class 5.1 or similar materials.

PRECAUTIONS

- Mandatory certificate of cargo properties.
- Mandatory gas monitoring and recording.
- Mandatory breathing apparatus, protective clothing or other equipment for toxic cargoes.
- Mandatory in relation to dust of toxic and abrasive properties of cargoes.

VENTILATION

- Mandatory mechanical ventilation with sufficient number of fans.

CARRIAGE

- Mandatory prevention of water ingress into holds for cargoes that react with water.
- Mandatory temperature monitoring of dangerous goods of class 4.2 and similar material.

SHIP DESIGN

- Mandatory design and/or special construction of ships with installation of special equipment.

Owners and Managers who are in doubt of the carriage of any IMDG are advised to contact Al-Bahriah who shall provide adequate safety recommendations.
